Jim Doyle
Governor

DATE: July 14, 2010
8:00 p.m.

TO: Governor Jim Doyle

FROM: Mike Hinman
WEM Administrator

SUBJECT: SITUATION REPORT #2 ON SEVERE WEATHER

OVERVIEW – Severe weather continues to move through Wisconsin and is expected to affect the State until the early morning hours. The State Emergency Operations Center (EOC) in Madison is actively monitoring the storms, with staff from Wisconsin Emergency Management and the Wisconsin National Guard Joint Operations Center in attendance. No injuries have been reported at this time.

We have received multiple reports of localized flooding, due in part to heavy rains of 4-5 inches in some areas. Downed trees and power lines have also been reported in numerous areas. The National Weather Service expects that the energy level of the storm will diminish after midnight, but that the storm will still be capable of producing isolated tornadoes, damaging thunderstorm winds and large hail until morning.

Several counties are under warnings and watches for severe weather and tornadoes. Most of the state is expected to be impacted by the severe weather tonight. The National Weather Service is forecasting a chance for tornadoes, straight-line winds, hail, heavy rains and flash flooding for much of the state throughout the evening.

Below are the latest damage reports as of 8:00 p.m.:

Marathon County – Scattered trees and power lines down, localized flooding and residential lightning strikes. Downed trees and power outages are also reported in Calumet, Lincoln, Waupaca and Wood Counties.

Outagamie County is partially activating their EOC in response to localized flooding in Appleton, Greenville and Kaukauna. The storm is still active in the area, and additional rainfall is expected. There is no request for state assistance at this time.

Trempealeau County is reporting two possible tornado touchdowns, strong winds and widespread heavy rain. Several trees are down in the towns of Hale and Pigeon, but no structural damage or injuries have been reported.
