About this document

This document provides summary information on the FFY2017 investment justifications that the Department of Military Affairs/Wisconsin Emergency Management (DMA/WEM) submitted to FEMA as part of Wisconsin's Homeland Security Grant Program application.

Included in the document is an introduction, risk assessment, a comprehensive budget identifying investments totaling \$3,962,000 and summaries describing each justification area.

If you have questions about the budget process or individual projects please email at Shannon.Ladwig@Wisconsin.gov.

Introduction

The Department of Military Affairs/Wisconsin Emergency Management (DMA/WEM) has developed the Wisconsin Homeland Security Grant Program (HSGP) investment budget for federal fiscal year (FFY) 2017. Investment summaries and budgets for all of the proposed investments are provided in this document.

The grant program, funded through FEMA, helps to protect Wisconsin's communities by building the capacity to prevent, respond to, and recover from a catastrophic incident. DMA/WEM is the State Administrative Agency (SAA) for the program.

DMA/WEM works directly with a broad spectrum of emergency response agencies at all levels of government in developing investments to improve the state's preparedness through planning, training, exercising, and the acquisition of specialized equipment. The program focuses on a number of priorities that include building interoperable communications, improving information sharing, developing regional emergency response, and increasing community preparedness.

Wisconsin's investments support the 2015-2018 State Homeland Security Strategy, which was updated by the Homeland Security Council and approved by Governor Scott Walker and serves as the guide for homeland security funding. In addition to supporting the statewide strategy, the investment budget is also designed to meet key federal grant requirements, such as the allocation of at least 25% to law enforcement activities and a pass-through of 80% to local governments. The local pass-through requirement is met by a combination of direct grants and agreements between state and local agencies.

The state's draft investment budget was developed through outreach to the public safety and emergency management communities through a number of working groups and committees used by DMA/WEM. Due to an unusually short application period of only 15 business days, WEM was unable to convene the Homeland Security Funding Advisory Working Group (FAWG), which normally offers budget recommendations for proposed projects. WEM staff works with stakeholders year round to discuss proposals and capability gaps in order to align proposals with the state's funding allocation and this year we used that information to make funding decisions. The FAWG committee consists of representatives from local fire and law enforcement agencies, EMS, tribal public safety, state agencies, non-profits, and the private sector. Local representatives are appointed by the state's public safety associations. Current membership of the Working Group represents the following organizations:

| | |
|--|--|
| Badger State Sheriffs Association | Department of Natural Resources |
| Wisconsin State Fire Chiefs Association | Department of Transportation |
| Wisconsin Chiefs of Police Association | Dept. of Ag, Trade and Consumer Protection |
| Wisconsin EMS Association | Department of Administration |
| Wisconsin Emergency Management Assoc. | Department of Health Services |
| WI Tribal Emergency Mgmt. Assoc. | Department of Justice |
| Voluntary Organizations Active in Disaster | Wisconsin Emergency Management |
| Milwaukee Urban Area Security Initiative | Department of Children and Families |
| SE WI Homeland Security Partnership | |

Budget Breakdown

In FFY2017, Wisconsin will receive a total of \$3,962,000 in State Homeland Security Program (SHSP) grant funding.

This year's allocation had a reduction of \$16,000 from previous years. There is an increase in funding to a few specific investments including Emergency Regional Response Teams, Intelligence & Information Sharing, and NIMS Implementation. These increases are related to building new capabilities.

| FY17 Investments | Total |
|---|--------------------|
| Critical Infrastructure – Food & Agriculture Security | \$30,000 |
| Emergency Regional Response Teams | \$1,759,109 |
| Intelligence & Information Sharing | \$907,000 |
| NIMS Implementation Training & Exercising | \$663,491 |
| WEM Administration & Planning | \$518,223 |
| Whole Community Preparedness | \$84,177 |
| Total: | \$3,962,000 |

* Law Enforcement Allocation: Across all investments, at least \$990,500 (25%) is allocated for law enforcement activities.

** Local Government Pass-through: at least \$3,169,600(80%) will be allocated for local projects.

Risk Assessment

Wisconsin's THIRA identifies and assesses eight threat and five hazard scenarios that would cause realistic catastrophic impacts for affected populations, and would put extreme stress on emergency management and response capabilities. These scenarios are:

- A major tornado striking a heavily-populated urban area
- Extensive wide-spread flooding
- A 104,000 acre wildfire in a high-risk wildland urban interface area
- A statewide flu pandemic
- A cyber-attack causing a widespread power outage
- A hazardous materials release in a densely populated area, requiring mass evacuation
- A lone-wolf terrorist attacking a crowded festival
- A Foot and Mouth Disease spread across the state and into neighboring states resulted in a Food and Agricultural Emergency quarantine.

The scenarios are not a ranked list of the highest threats and hazards in Wisconsin. They were developed to represent a cross-section of threats and hazards, addressing at least one natural, human-caused and technological hazard. Their purpose is to provide the basis to assess broad range impacts on all 32 core capabilities, which will help assess capability and capacity.

The current terrorist threat is real. Organizations such as ISIS/L openly advocate for radicalization of extremists to attack targets in the homeland. Frequently identified targets include law enforcement and military personnel, and large public gathering/celebrations. A key enabler of this focus is social media, which provides robust, unfiltered, and persistent access to large numbers of people at home and around the world who are vulnerable to disinformation and radicalization.

According to the State of Wisconsin's Hazard Mitigation Plan, flooding and tornadoes are the most frequent and damaging natural hazards in the state, followed by severe winter storms and wildfires. Major floods have occurred in eight of the last ten years. With an average of 23 tornadoes per year, Wisconsin ranks 17th nationally in frequency and number of fatalities. Since 2000, Wisconsin has received a total of 16 federal disaster declarations involving flooding, severe storms, and tornadoes. In addition, the state received two emergency declarations for snow removal following major winter storms.

Record flooding in southern Wisconsin in 2007 and 2008 caused hundreds of millions of dollars in damage to homes, businesses, local infrastructure, and agricultural losses. The 2008 flooding event shattered records, with damage exceeding \$765 million and more than 40,000

households requesting disaster assistance with the Federal Emergency Management Agency (FEMA). The 2008 flooding became the most expensive disaster in state history.

Among technological hazards, hazardous materials releases are a source of risk for Wisconsin. The state has more than 6,500 facilities that are required to report under the Emergency Planning and Community Right-to-Know Act (EPCRA), one active nuclear plant and one just across our border in Minnesota. Hazardous materials shipment by highway, pipeline, barge, and rail also require planning. The latter risk has grown significantly over the past few years as the volume of crude oil shipments through Wisconsin has increased.

The threat of cyber-attacks has evolved so rapidly in recent years that any attempt to list recent historical occurrences is quickly outdated. Since 2009, there has been an increase in cyber-based attacks directed at power generation and oil companies. The attacks have used a mix of spear-phishing, social engineering, operating system bugs, and remote administration tools (RATs) for access; none of these approaches are very advanced or hard to develop and manage. There are several independent cyber-terrorist groups that are perpetrating crimes against public and private networks, as well as government networks. These groups typically operate with the intent to gain access to sensitive or classified material and disseminate it to the public as a means to discredit or embarrass the target. There is no magic bullet for cyber preparedness—disciplined processes are required that mitigate exposure and provide robust response capabilities when cyber events occur that stop the bleeding, triage the damage, and move quickly to limit damage and assure state operability.

As a geographically and demographically diverse state, there are significant regional differences in the anticipated likelihood and consequences of threats and hazards across the state. An informal survey of the six Wisconsin Emergency Management regions found that tornadoes were considered to be among the most significant hazards in five of the six regions, while cyber incident/power outage and hazardous materials incidents were also consistently ranked high. Flooding received a high ranking in the southwest and west central regions.

In addition, the implementation of Wisconsin's investments will use risk-based allocation methodologies that take into account for areas of concentrated risk in high-population areas of the southern portion of the state. The state also assesses risk by conducting a comprehensive Threat and Hazardous Incident Risk Assessment (THIRA). The THIRA was completed in December 2016 and it is updated on an annual basis in accordance with federal grant guidance.

Critical Infrastructure – Food & Agriculture Security

FY17 Funding Amount: \$30,000

Investment description

This investment contains two initiatives.

1. DATCP Multi-state Partnership Support and Exercise: This funding will provide continued financial assistance to the Multi-State Partnership (MSP) for the ongoing exercise and planning efforts. The allocation for this project is \$12,000.
2. DATCP Response Equipment: This project will fund the purchase of six hand held portable radios and necessary accessories to ensure field response operation are able to communicate during an agricultural emergency. Prior communications equipment relied on cellular capabilities, which were plagued by signal quality and radon “dead spots”. The allocation for this project is \$18,000.

Budget

| Solution Area | Amount of Proposed Funding (\$) |
|---------------|---------------------------------|
| Planning | \$ |
| Organization | \$ |
| Equipment | \$18,000 |
| Training | \$12,000 |
| Exercises | \$ |
| Total: | \$30,000 |

Emergency Regional Response Teams

FY17 Funding Amount: \$1,759,109

Investment description

This Investment consists of three projects: ALERT, Wisconsin Task Force 1 (TF-1), and Crude Oil Foam for a spill response.

1. The Aligned Law Enforcement Response Team (ALERT) initiative is comprised of local law enforcement tactical and bomb teams representing each of Wisconsin’s seven

Emergency Police Service (EPS) areas. The initiative includes eight regional SWAT teams, comprised of ten agencies, and five EOD teams comprised of eight agencies that have signed agreements to participate.

The mission of the specialty teams is to provide armed, tactical response in environments containing Weapons of Mass Destruction (WMD) and/or acts of terrorism and to provide a resource for mutual aid to jurisdictions in need of additional tactical capabilities and specialty teams. The SWAT and EOD teams possess equipment inventories.

Advanced training allows for enhanced tactical and hazardous device related services to include large scale coordinated responses. Each agency is required to fulfill strict standards of training and other requirements outlined in a Standard Operating Procedural manual and overseen by an Executive Committee.

This proposal will provide funding for new equipment, improved specialized equipment, and advanced and contemporary training that allows the teams to maintain capabilities and to reach out to partnering agencies and build better working relationships and trust with those agencies, through collaborative training.

Funded projects are a part of a multi-year funding plan approved by the Alert Executive Group. This project was allocated a total of \$828,500 for the purchase of training and equipment such as; Ballistic Engineered Armored Response Counter Truck (Bearcat), chemical protection suits, portable x-ray, pole camera, Carbon Fiber Paks, Throwbots, and ballistic protection. Some equipment is subject to a cost share with the locals.

2. Wisconsin Task Force 1 (WI-TF1) is an Urban Search and Rescue response team designed to provide a coordinated response to disasters in urban environments. Emphasizing on locating and extricating victims trapped in collapsed structures, confined spaces, or trenches in largely populated areas, the task force is capable of responding to State disasters including earthquakes, flooding, widespread tornadoes, and man-made technological and terrorist events, and being self-sustained for a minimum of 72 hours. WI-TF1 is also capable of operating on behalf of local jurisdiction responders when they are either absent or conditions exceed their internal capabilities, recognizing "*home rule*" governance exists in the State of Wisconsin. This specialized operational assistance is an augmentation to local emergency once it is recognized that incident conditions will exceed local asset capabilities and significant state response assets are required.

WI-TF1 can provide assistance in a number of ways, including;

- ✓ Reconnaissance to assess damage, determine needs, and to provide feedback to local, state, and federal officials
- ✓ Conduct hazard surveys and evaluation of affected areas
- ✓ Conduct shoring and cribbing operations as required, conducting physical search and rescuing inside damaged and collapsed structures
- ✓ Provide emergency medical care to Task Force personnel and severely injured disaster victims or those who are still trapped and in need of extrication
- ✓ Conduct Wide Area Search operations over large areas

WI-TF1 is a state resource authorized through Wisconsin State Statute #323.

This project was allocated a total of \$880,609 to equip, train and exercise the team.

3. Foam for Crude oil Response: The State of Wisconsin continues to be a major transportation corridor for the highly flammable Bakken crude oil from North Dakota and Canada. This project would continue to improve the capacity of resources to deal with bulk, flammable liquids being transported within/through Wisconsin (crude oil or other products). This project will purchase additional Class B Foam to be kept in critical regions of Wisconsin for deployment. The cost is \$50,000

Budget

| Solution Area | Amount of Proposed Funding (\$) |
|---------------|---------------------------------|
| Planning | \$ |
| Organization | \$ |
| Equipment | \$888,500 |
| Training | \$870,609 |
| Exercises | \$ |
| Total: | \$1,759,109 |

Intelligence & Information Sharing

FY17 Funding Amount: \$907,000

Investment description

This initiative funds two programs: the Wisconsin Statewide Information Center (WSIC) and the Southeastern Wisconsin threat Analysis Center (STAC).

1. The WSIC is an “all-crimes, all-hazards, all-threats, and all-events” intelligence fusion center. The WSIC serves as a focal point for information sharing in the state and local environment and has been designated by the Governor, through his Homeland Security Advisor (HSA), as the primary state fusion center in Wisconsin. The primary mission goals of the WSIC are:
 - Provide law enforcement, fire service, emergency management, public health, military, and other key private sector security partners with the ability to assimilate and utilize broader based intelligence to more effectively address the state’s need for information sharing amongst those responsible for protecting our citizens.
 - To effectively gather, receive, analyze and disseminate relevant intelligence to the appropriate agency or private sector partner in the most concise and expedient manner possible.
 - Provide analytical, technical and major case criminal investigative support to law enforcement partners across the state.
 - Communicate, coordinate and collaborate at all levels of government to ensure that fair, objective and unbiased intelligence products are maintained, distributed or purged as required and in compliance with state and federal regulations concerning privacy, civil rights and civil liberties.

The WSIC was allocated a total of \$655,000. The FY17 funding will be used for continued support, maintenance and training for WSIC operations and to conduct training programs such as; TLO/FLO/CLO.

2. The Southeastern Wisconsin Threat Analysis Center (STAC) is currently one of 78 Fusion Center recognized by the US Department of Homeland Security (DHS). STAC is one of two centers in the State of Wisconsin with an area of responsibility that covers SE Wisconsin. FY17 funding will be used for four projects for the STAC.
 1. Operations/Training for Analysts: This training will expand existing capabilities within the fusion center; situational awareness, collaborate with local, state and federal law enforcement agencies to identify and minimize threat factors; maintain and expand partnerships with the private sector. The allocation for this project is \$30,000

2. **Public Health/Medical Threat Intelligence Analyst:** The analyst will work with the STAC, public health, healthcare, and emergency management partners to provide real-time medical information to regional stakeholders to prepare, plan, mitigate, respond, and recover from an incident that will require a community response. The person in this position working with the STAC intelligence analyst to ensure up to date information sharing occurs. This position has a cost-share and the HS funds pay for half of the position (\$40,000).

3. **New server for the WiWATCH Portal:** The STAC uses a combination of the Nationwide Suspicious Activity Reporting Initiative (NSI) and Suspicious Activity Reports (SAR) to gather, document, process, and analyzes information from the public, state, local, tribal, and federal partners in the prevention of crime and terrorism. The WiWatch is an online presence for the SAR information and allows the STAC to act as the principal recipient and collator of this information. This project is allocated \$30,000.

4. **New analyst position within the STAC:** The position will provide support in the form of analytical, technical, and major homeland/criminal investigative aid to all levels of government and other private sector security partners. Objectives will include infrastructure Protection Analysis, general analytical work, exercising, and training related to STAC Operations. This project was allocated \$152,000.

Budget

| Solution Area | Amount of Proposed Funding (\$) |
|----------------------|--|
| Planning | \$847,000 |
| Organization | \$ |
| Equipment | \$30,000 |
| Training | \$30,000 |
| Exercises | \$ |
| Total: | \$907,000 |

NIMS Implementation Training & Exercising

FY17 Funding Amount: \$663,491

Investment description

This project contains 6 initiatives.

1. **Training and Exercise officers:** to assist counties and tribes with table top, functional and full scale exercises. The exercise officers will ensure NIMS compliance in exercise design and will readily use the HSEEP exercise system and building block approach. The exercise officers will assist in meeting county and tribal deliverables. The exercise officers will also ensure that after action reports and improvement plans are written for the exercises they are involved in. The training and exercising officers also work on training related projects that are a part of WEM's training and exercising program. Funding in the amount of \$173,090 includes costs for personnel, fringe, supplies, indirect as assessed by DMA, travel and training. This project has a cost share as 2/3 of the cost is paid by HS and 1/3 is paid by EMPG.
2. **NIMS/ICS Training:** to state and local emergency responders and the private sector at no-cost through the Statewide Training Portal. Funding is used for contractor fees for certified instructors, supplies, and travel. A total of \$160,401 was allocated for this program.
3. **Local Exercises:** this is a competitive grant program that funds exercise contractor support, supplies, and travel for county and tribal exercises. These funds often supplement WEM exercise officers for larger functional and full-scale exercises, or provide support for exercises when WEM staff is unavailable. A total \$140,000 was allocated for this program.
4. **State and Local Collaboration Exercises:** This will provide funding to local agencies so they can participate in large scale exercises with state agencies. This collaboration will benefit all involved parties when responding to actual incidents. In addition, funding will support Public/Private partnership workshops and other related initiatives for existing public/private partnerships. This project was allocated \$30,000.
5. **SEOC Equipment:** This project will fund the installation of additional projectors and screens in the State Emergency Operations Center (SEOC). This enhancement will create large displays of multiple informational sources such as; weather, power outage, local status reports, etc. this information in one common area provides a complete operating picture for the incident, improving situational awareness for agencies in the SEOC. This project was allocated \$120,000.
6. **Credentialing & Server:** this funding will support two projects. First, the purchase of a credentialing system, which will allow Capitol Police to implement a state-wide credentialing system to ensure the credentials are consistent, uniform, as well as being

compliant with the network access requirements. The second project will be used to purchase a server. The server will not only host the new credentialing system but will consolidate several other systems and various programs. This consolidation of information will be easily accessible and can be disseminated to other agencies during an active response for situational awareness and information sharing capability. This project was allocated \$40,000.

Budget

| Solution Area | Amount of Proposed Funding (\$) |

| Organization | \$ |
| Equipment | \$160,000 |
| Training | \$160,401 |
| Exercises | \$170,000 |
| Total: | \$663,491 |

WEM Administration & Planning

FY17 Funding Amount: \$518,223

Investment description

As the State Administrative Agency, DMA/WEM has the responsibility for all aspects of the programmatic and financial administration of the Homeland Security grants, which includes; developing funding announcements, reviewing and processing applications, processing payments, monitoring grant activity, and completing reporting requirements.

Budget

| Solution Area | Amount of Proposed Funding (\$) |

Whole Community Preparedness

FY17 Funding Amount: \$84,177

Investment description

This initiative funds the Whole Community Preparedness Coordinator position.

The Whole Community Preparedness Coordinator will conduct outreach activities to the private sector, individuals and families that will help them to better prepare their businesses and homes. This will help to minimize the impacts of a disaster, because of the planning and preparation completed in anticipation of an emergency.

The preparedness coordinator position is the liaison with the private sector and their assistance in a disaster through the Business Emergency Operations Center (BEOC) along with the Virtual Business Emergency Operations Center (VBEOC). The preparedness coordinator has been meeting with businesses in the critical infrastructure sector and important service providers.

This position supports existing public private partnership and works to pursue opportunities to introduce new partnerships. This project is allocated a total of \$84,177.
