The grant funding opportunities are a part of Wisconsin's investment budget for federal fiscal year (FFY) 2017. In FFY2017, Wisconsin will receive a total of \$3,962,000 in State Homeland Security Program (SHSP) grant funding.

The grant program, funded through Federal Emergency Management Agency (FEMA) Department of Homeland Security (DHS), helps to protect Wisconsin's communities by building the capacity to prevent, respond to, and recover from a catastrophic incident. DMA/WEM is the State Administrative Agency (SAA) for the program.

DMA/WEM works directly with a broad spectrum of emergency response agencies at all levels of government in developing investments to improve the state's preparedness through planning, training, exercising, and the acquisition of specialized equipment. The program focuses on a number of priorities that include building food and agriculture emergency response capability, improving information sharing, developing regional emergency response, and increasing community preparedness.

Wisconsin's investments support the State Homeland Security Strategy, which serves as the guide for homeland security funding. In addition to supporting the statewide strategy, the investment budget is also designed to meet key federal grant requirements, such as the allocation of at least 25% to law enforcement activities and a pass-through of 80% to local governments. The local pass-through requirement is met by a combination of direct grants and agreements between state and local agencies.

The state's draft investment budget was developed through outreach to the public safety and emergency management communities through a number of working groups and committees used by DMA/WEM. Due to an unusually short application period of only 15 business day, WEM was unable to convene the Homeland Security Funding Advisory Working Group (FAWG), which normally offers budget recommendations for proposed projects. WEM staff works with stakeholders year round to discuss proposals and capability gaps in order to align proposals

with the states funding allocation and this year we used that information to make funding decisions. The projects funded in these Investment Justifications were submitted to FEMA DHS on June 20, 2017. The details of the projects and budgets were sent to the Homeland Security FAWG on June 23, 2017. This committee consists of representatives from local fire and law enforcement agencies, EMS, tribal public safety, state agencies, non-profits, and the private sector. Local representatives are appointed by the state’s public safety associations. Current membership of the committee represents the following organizations:

- Badger State Sheriffs Association                      Department of Natural Resources
- Wisconsin State Fire Chiefs Association            Department of Transportation
- Wisconsin Chiefs of Police Association            Dept. of Ag, Trade and Consumer Protection
- Wisconsin EMS Association                            Department of Administration
- Wisconsin Emergency Management Assoc.        Department of Health Services
- WI Tribal Emergency Mgmt. Assoc.                Department of Justice
- Voluntary Organizations Active in Disaster      Wisconsin Emergency Management
- Milwaukee Urban Area Security Initiative        Department of Children and Families
- SE WI Homeland Security Partnership
