

# Homeland Security Exercise and Evaluation Program

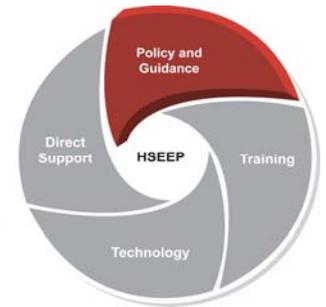

## Volumes

### OVERVIEW

The intent of the Homeland Security Exercise and Evaluation Program (HSEEP) is to provide common processes, consistent terminology, tools, and policies that are practical and flexible for all exercise planners. The HSEEP Reference Volumes deliver exercise program guidelines that capture lessons learned and best practices of existing exercise approaches, while suggesting strategies that align exercise programs within a broader spectrum of preparedness activities, such as training, planning, and equipment purchases. The Volumes can be adapted to a variety of scenarios and events (e.g., natural disasters, terrorism, technological calamities).

HSEEP integrates language and concepts from the National Response Plan, National Incident Management System, National Preparedness Goal, Universal Task List, Target Capabilities List, existing exercise programs, and representative prevention and response protocols from all levels of government.

### VOLUMES

*HSEEP Volume I: HSEEP Overview and Exercise Program Management* provides guidance for building and maintaining an effective exercise program and summarizes the planning and evaluation process described in further detail in Volumes II and III.

*HSEEP Volume II: Exercise Planning and Conduct* helps planners outline a standardized foundation and a design, development, and conduct process adaptable to any type of exercise.

*HSEEP Volume III: Exercise Evaluation and Improvement Planning* offers proven methodology for evaluating and documenting exercises and implementing an improvement plan.

*HSEEP Volume IV: Sample Exercise Documents and Formats* provides sample exercise materials referenced in HSEEP Volumes I, II, III, and V. The HSEEP Volume IV Library is located on the HSEEP website.

*HSEEP Volume V: Prevention Exercises* contains guidance consistent with the HSEEP model to assist jurisdictions in designing, conducting, and evaluating exercises that test pre-incident capabilities such as intelligence analysis and information sharing.
